Mid-level Recruitment

Success in almost every business depends upon the right blend of strategies & operations. While the top management is involved in the former, it is the Middle-level which, acting as a strong interface, is actually implementing them with the support of junior management. The Middle level thus needs to have the right skills to first understand the planned strategies in their corresponding functions and then communicate well to the junior management for successful implementation.

Mid-level recruitment has always been a great challenge across the corporate world for the reasons mentioned above and also due to a high level of attrition. Our team, with its innovative recruitment methodology consisting of screening process through multiple phases including unique assessment systems and general reference checks, combined with strong industry connectivity, high-end technology base and global markets experience, offers such talent acquisition solutions which are thoroughly integrated with the need of the hour, finally providing ideal Middle managers with the required capabilities.

Junior Management & Entry-level Recruitment

Large-scale Recruitment –

Getting the right talent at the bottom of the pyramid, whether at entry-level or junior management, is the biggest challenge for any organization today.

Our team has a very innovative resourcing model through–

1. A strong pan-India network of colleges, institutes & universities
2. A unique modularized online screening & assessment system (PISA system), customized as per the requirements of a client

This proprietary assessment system not only defines the candidate's present status in terms of possessing relevant skills but also provides scalability so that a larger pool of candidates can be assessed for the positions defined.

Post the assessment, a structured training process not only trains candidates on individual needs but also prepares them for the required skills needed from the clients' side. The complete cycle as above provides us the opportunity to offer end-to-end services to assist clients in hiring this 'custom-made' finished product.

2. Testing, Assessment & Profiling:

- Competency & Personality profiling on various standards through World-Class assessment tools is one of the major strengths of Populace World Solutions.
- We follow the exact Requirement Mapping Process as the functional basis for assessment of the candidate.

We assess the candidates through various tests depending on the nature of the role–

- Aptitude Tests
- Case Studies
- Personality Profiling Tests
- Psychometric Tests
- Comprehensive Analysis Tools & Assessment System covers the entire spectrum of behavioural and functional skills

The personality is analysed using various sets of character traits such as–

Dedication
Need for oversight
Firmness
Humility

Sensitivity
Adaptation /Improvisation
Committed
Intuitive

Teamworker
Independent
Cooperative
Dynamic

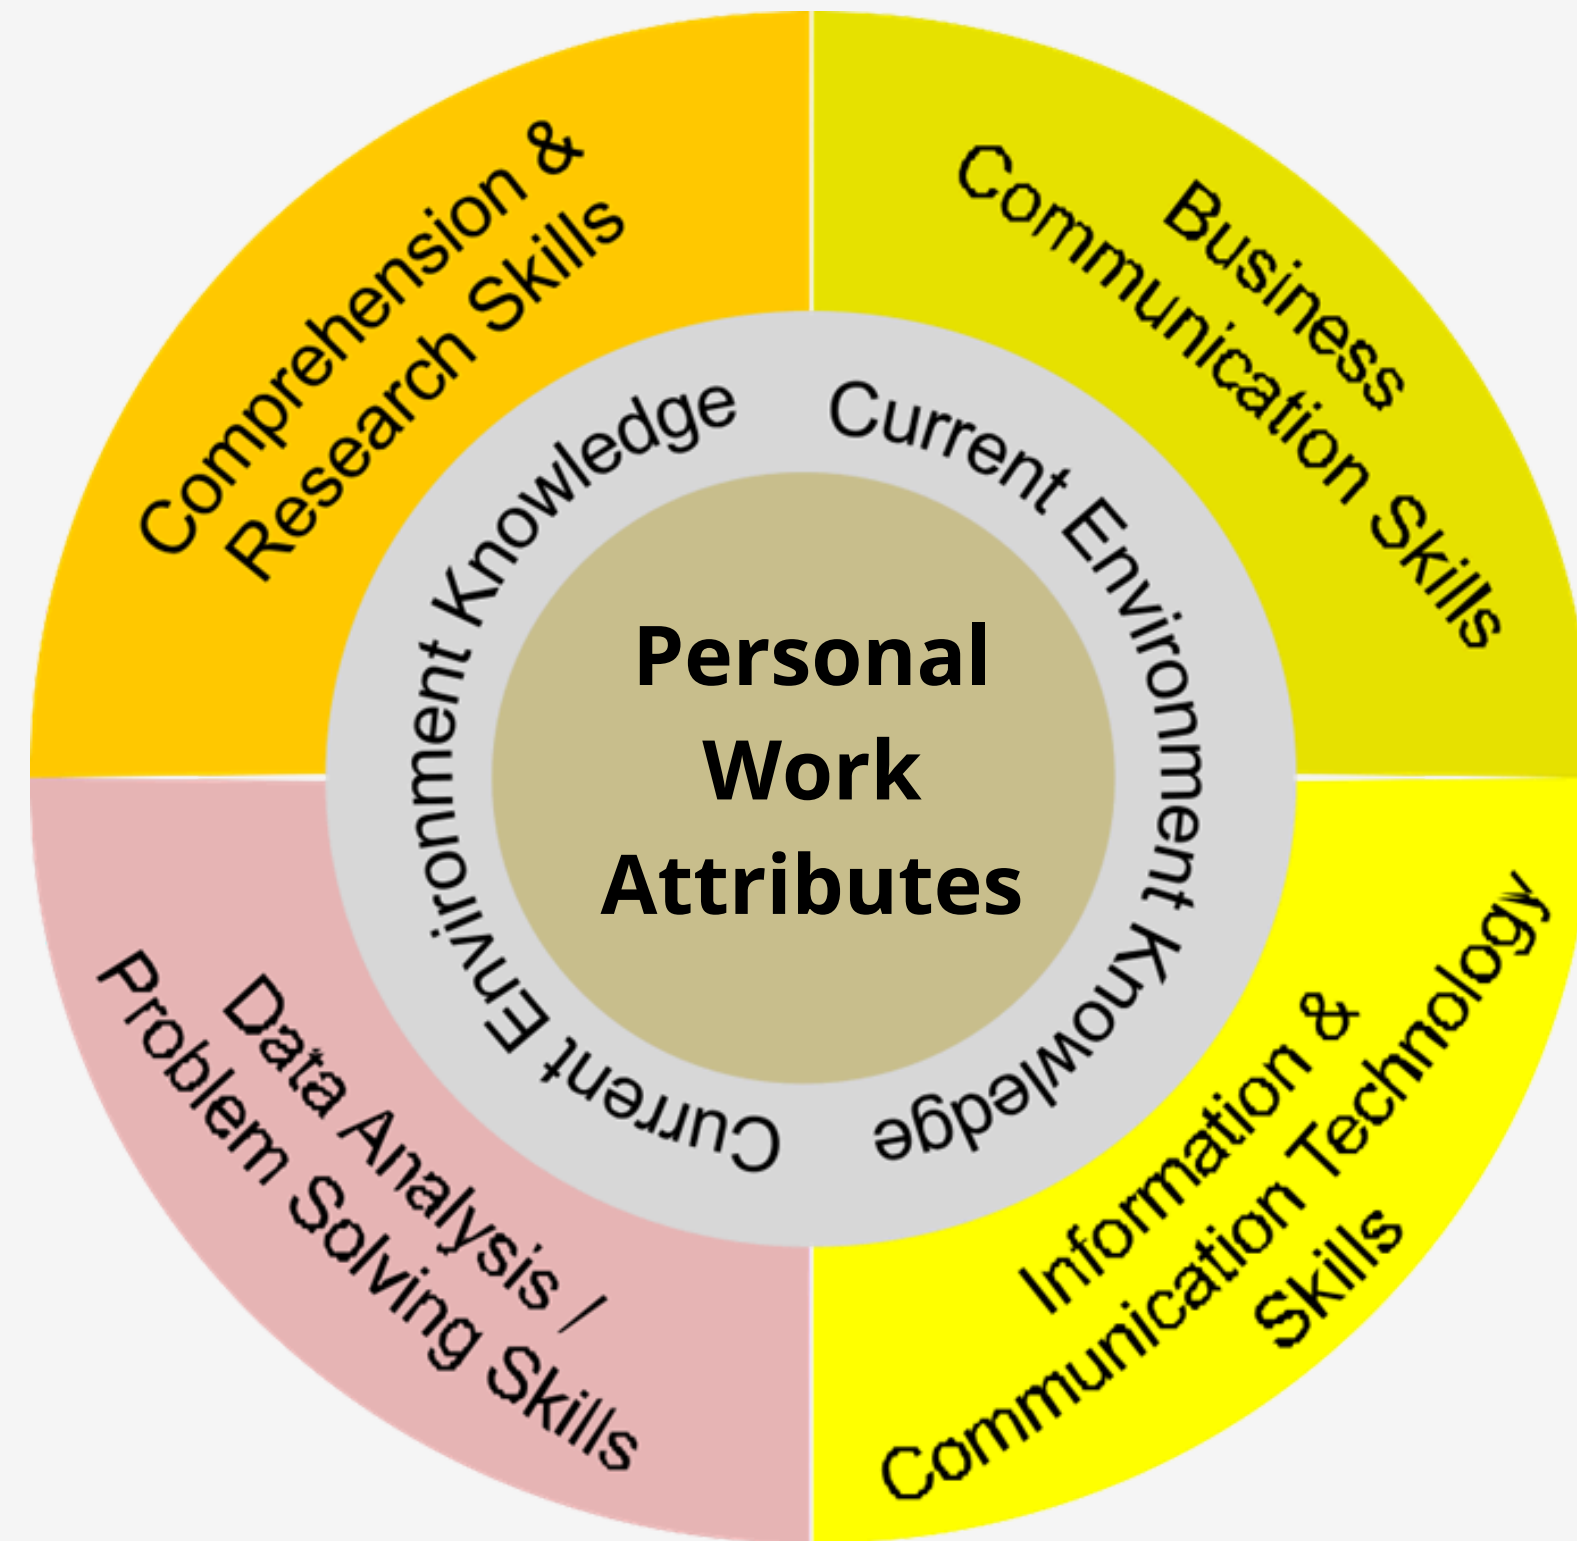

A comprehensive report is generated based on the assessments carried out as above, covering an analysis of strengths, weaknesses, and scope of improvements, to develop to give the client a complete picture of the candidate.

Our proprietary tool, The PISA (Practical Industry Skills Assessment) System ensures core skills testing through multiple behavioral aspects:

We assess the candidates through various tests depending on the nature of the role. The PISA system –

3. Steps involved in Training & Development Program:

LEARNING & DEVELOPMENT PROGRAMS

- 1 TRAINING NEED ANALYSIS
- 2 DESIGNING CONTENT & MODULES
- 3 DELIVERY
- 4 POST DELIVERY EVALUATION

4. HRPO (HUMAN RESOURCE PROCESSES OUTSOURCING):

We offer strategic outsourcing solutions to clients to enable them to focus on their core competencies and reduce HR costs.

Strategic outsourcing solutions that give clients access to intellectual capital which may not be available in-house.

By handling all the backend processes in an efficient and time-bound manner, we help organizations to focus on their core processes.

We help SMEs achieve economies of scale, high efficiency, and expertise that large companies enjoy.

ADVANTAGES OF HR OUTSOURCING
